

Problem: Pathological
Temporal States

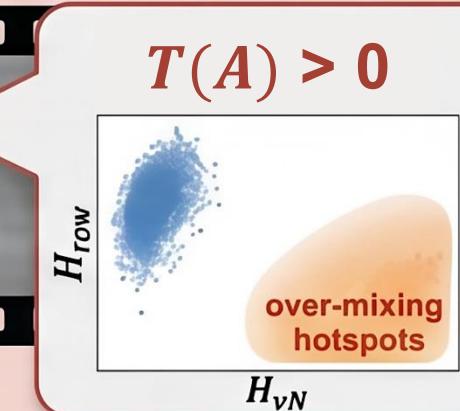

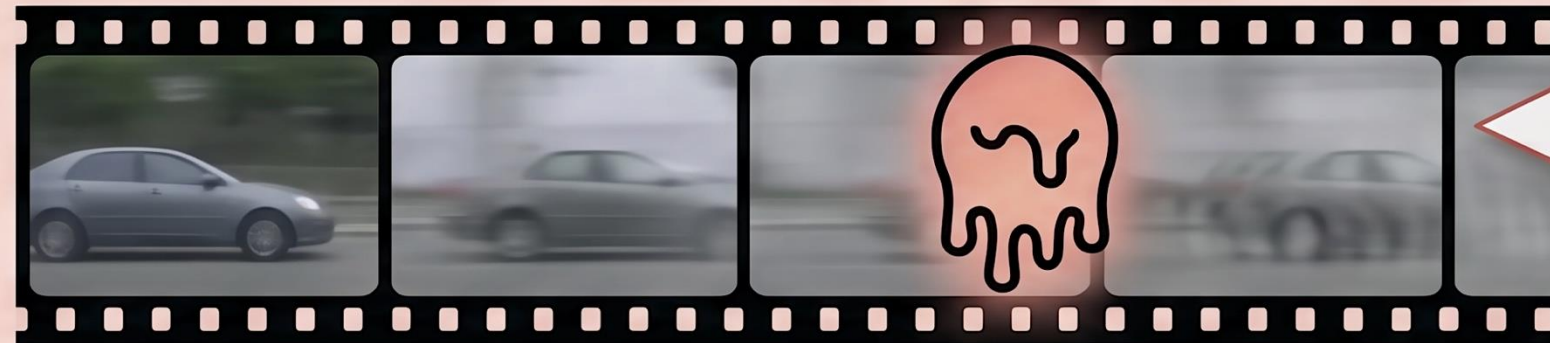

Fragmented Transport ($T(A) < 0$)

Identity Drift,
Unstable Details.

Overly Sharp Attention

Over-mixing Hotspots ($T(A) > 0$)

Unnatural Motion,
Background
Flicker.

Overly Diffuse Attention

Method: Spectral
Transport
Homeostasis

Spectral Transport Homeostasis

Spectral Transport Diagnosis

$$T(A) = \underbrace{H_{row}}_{\text{(Local Diffuseness)}} - \underbrace{H_{vN}}_{\text{(Global Diversity)}}$$

Query-Temperature
Regulator

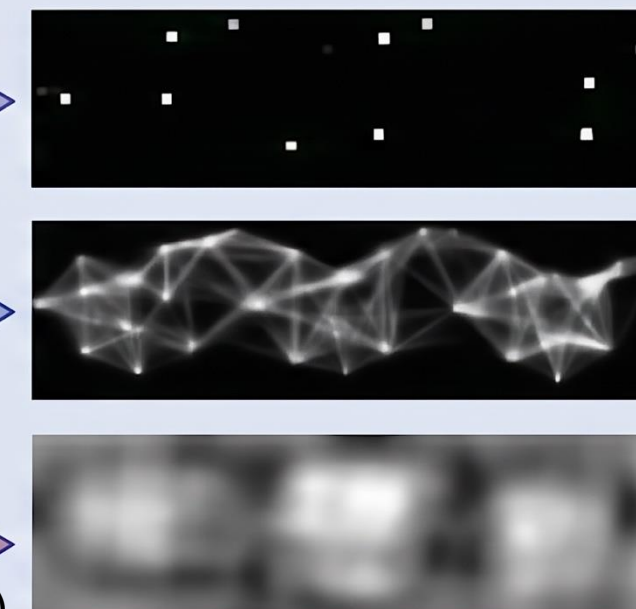

Soften

(Lower query scale)

Preserve

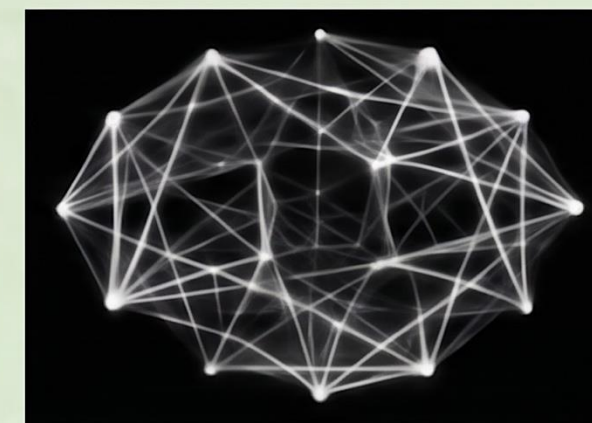

Sharpen

(Higher query scale)

Result: Balanced
State Transport

Balanced Temporal State Transport ($T(A) \approx 0$)

$T(A) \approx 0$

Coherent Stories,
Stable Subjects,
Natural Motion.

Balanced Attention
